

The Honda Grom (17-24) and Monkey (19-24) Adjustable Kickstand PRODUCT INFORMATION

The Honda Grom (17-24) and Monkey (19-24) Adjustable Kickstand is designed to easily provide users with a full range of adjustability from 'ultra-slammed' drag to street applications using only a 4mm hex key. **Adjustment ranges: -2.00" to -4.00"**

ATTENTION: When altering the factory-set length of the kickstand, the included Blue threadlocker must be reapplied to the Adjustment Bolt (3). TRS will not warrant parts lost as a result of failure to do so.

Package Contents: Package Contents Include:

1. **Black Anodized Body** - One piece (1 pc)
2. **Black Anodized Foot** - One piece (1 pc)
3. **Adjustment Bolt** - One piece (1 pc)
4. **Spring Mounting Stud** - One piece (1 pc)
5. **Blue Threadlocker 0.5ml** (not shown) - One piece (1 pc)

*If your package contents differ,
please email The Ruck Shop
at info@theruckshop.com*

*For additional installation support
please refer to the OEM service manual.*

Installation Notes

- Install using the OEM kill switch, springs, and mounting hardware.
- When adjusting the foot length, blue threadlocker (supplied) must be applied to the threads of the Adjustment Bolt (3) before installation.
- Red threadlocker is applied to the Spring Mounting Stud (4) threads during factory assembly. The Spring Mounting Stud (4) should not be removed. In the event removal is required, apply red threadlocker to the threads before installation.
- Installation Tip: To ease spring removal/installation, fold the kickstand down to fully extend the spring. Place a penny between each of the open spring coils. When the kickstand is folded up, the spring will remain extended, making it easier to remove/install.

ALL TRS PRODUCTS ARE DESIGNED FOR CLOSED-COURSE RACETRACK USE ONLY!
